DESKTOP, WEB & MOBILE PROJECTS

- **The Best Food App - Flutter**
This app, which is still under development, provides online food ordering and order tracking facilities. I use APIs and Google Maps in this app. [GitHub - The-Best-Food-App](#)
- **Get Fuel App (Conceptual App) - Flutter**
I have developed this app to help people use the current QR code fuel dispensing system in a more convenient way. [GitHub - Get-Fuel-App](#)
- **Gym Management App & Web for Brothers Gym - Mawanella**
The app is currently being developed to manage the day-to-day activities of the Brothers gym (for example, adding new members, making payments). Flutter and Firebase are used to develop the app.
The web is developed by Laravel framework.
Mobile App projects such as Chat App, News App, Covid Dashboard, ToDo App are completed during flutter learning time.
- **Lak Market (Master Market to Connect Sellers and Customers)**
This is being developed as the university mini-project. This is an e-commerce web platform. Depending on the area where the customer is located, they can choose the store and purchase products and get the direction to that store. This is being developed using the Laravel PHP Framework. [GitHub-LakMarket](#)
- **SmartCovidAssist System**
SmartCovidAssist is Covid-19 quarantine patients and contacts monitoring system using mobile app in IOT environment. I am developing the back-end. Also this is a teamwork and this project suggested for the health ministry. This project was selected for the final round in the **NBQSA 2021 Competition**.
